City, state, ZIP

1. Fill in your contact information above. List each farm you farm by name or location (township, section). **Leave the farm code blank**; the office will assign it.
2. **Splits**: write your share of each farm, and the name and share of any landlord or other owner (for example: you 50%, Jane Doe 50%).
3. Check the crop on every farm. Only **corn** is enrolled in 45Z; please mark soybeans, wheat and other crops too. Write the acres and an **average yield** (bu/acre) for your 2026 crop, actual or expected. Exact yields for each field are not needed.
4. **Only one person per farm needs to enroll it, and it should be the producer** who farms it. Return by **October 31, 2026**.

Please read. Pre-enrollment is free and informational. It is not an offer, a contract, or a guarantee of payment. Payment depends on four conditions being met for everyone: Alto qualifies for the 45Z credit; Alto actually receives the credit money; the program average is below 4,908 g CO₂e/bu (CI 21.68) across all enrolled corn; and Tremont receives the funds before paying them out. The 45Z attributes of enrolled corn belong to this program only; the same bushels cannot be entered in another 45Z or carbon program. Information I give must be accurate; payments tied to a credit later reduced because of inaccurate information can be recovered. Not tax, legal, or financial advice.
